## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1-8 and 10-11 are allowed. The following is an examiner's statement of reasons for allowance:

The claimed invention is a bipolar transistor comprising an emitter layer containing an impurity of a first conductivity type, a base layer containing an impurity of a second conductivity type, and a collector layer containing the impurity of the first conductivity type, said bipolar transistor having:

- A high-concentration doped layer being provided in the emitter layer and doped with the impurity of the first conductivity type at a higher concentration than in the emitter layer, wherein a composition of a material composing the emitter layer is the same as that of a material composing the high-concentration doped layer,
- The high-concentration doped layer is a barrier layer from the viewpoint of holes in the base layer,
- A Ge composition ratio in the base layer increases from a region in contact with the emitter layer toward a region in contact with the collector layer, and thereby the base layer has a portion with a band gap gradually decreasing from a region of the base layer in contact with the emitter layer toward a region of the base layer in contact with the collector layer
- The emitter layer has at least two semiconductor layers,

- The high-concentration doped layer is interposed between the at least two semiconductor layers.

Reference Jorke (US 5,798,539) does not disclose a high-concentration doped layer in the emitter layer, where the high-concentration doped layer is interposed between the at least two semiconductor layers, and the Ge composition ratio in the base layer increase from a region in contact with the emitter layer toward a region in contact with the collector layer.

Reference Yamazaki (US 5,440,152) does not disclose the emitter has at least two semiconductor layers, the high-concentration doped layer is interposed between the at least two semiconductor layers, and a high-concentration doped layer is a barrier layer in the base region.

Therefore, the above references do not disclose the claimed invention of the present application and claims 1-8 and 10-11 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
